EasyStart™ Flex Soft Starter
For Residential and Commercial HVAC

Our EasyStart Flex™ Soft Starter, the most advanced and versatile HVAC soft starter, works with AC units up to 6 tons. It is truly a one-size-fits-all soft starter.

c UL us LISTED

Generators are a great backup or power source but have limits. They often lack the power to START AC units that they can otherwise run. Imagine an engine that can RUN but not START your car. The EasyStart™ Flex eliminates this problem—it can start an AC unit for anyone wanting comfort, especially those requiring it for special medical needs.

Even without emergency power requirements, the EasyStart™ Flex smooths AC startups with its gentle ramping. This eliminates blinking lights, loud startup slams, and shaking at commencement.

Along with a two-year limited warranty, Micro-Air provides U.S. based technical support.

EasyStart™ Flex Soft Starter

Tonnage	BTUs
6 ton	72,000
5 ton	60,000
4 ton	48,000
3.5 ton	42,000
3 ton	36,000
2 ton	24,000
1.5 ton	18,000
1 ton	12,000

"Using a low-cost generator and EasyStart™, I solved our problem of always needing AC for my wife's illiness.

We now have emergency power and can run our AC during California's Public Safety Power Shutoffs for high winds."

-Joe

Additional Features

- Perfect emergency power solution for small/medium sized generators
- Easy integration for off-grid living with solar
- Start AC on battery walls and inverter generators
- Supports both 115V and 230V motors
- Specialized fault diagnostics not found in any other soft starter
- Small enclosure footprint—fits inside most AC units
- Reduces startup current up to 75%

How EasyStart™ Helps Your Home and Family?

Ensure your AC can start–emergency situations can strike without warning

Supports commercial grade central air conditioning units

UV-protected and water resistant enclosure

No power, no problem. Start your AC on a generator, solar arrays, or limited power
